Hospital Scheme Defeated By 25

Scheme Rejected By Small Margin

The Little Bow Municipal Hospital Scheme, voted on a week ago today, was defeated by 25 votes. Out of 175 cast, 284 were in favor and 180 against, with 11 votes disqualified. Two-thirds of the votes cast must be in favor of the scheme before it is accepted.

The vote by polls is as follows:

No.	Poll	For	Ag't
1	Carmangay	77	11
2	Neil Mcleod	41	5
3	S. Thompson	45	0
4	Barnhill S.	2	30
5	Bowville S.	26	4
6	H. A. Frank	41	26
7	G. Simmons	33	11
8	Barons	12	59
9	Sam Taylor	7	34

Anglican church service this week will be in Champion Community hall at 11 a. m. Holy Communion.

TWENTY YEARS AGO

Twenty years ago two farmers' grain companies serving Alberta Farmers were amalgamated to form United Grain Growers Limited.

The twenty years that have passed have increased the confidence of farmers in this farmer-owned institution. Satisfactory experience in the handling of their grain is the basis of that confidence.

"WASHDAY IS FUN!"

SINCE I GOT MY GENERAL ELECTRIC WASHER"

BRING washday magic into your home with a new General Electric Washer. Just put your clothes into the tub, touch a switch, and the washer does the hard work. The exclusive G-E Activator washes the clothes as individual pieces without tangling or braiding. You save time—washday drudgery—and always are sure of a snowy-white wash.

If you are without electric power in your home, a General Electric gas-line-driven washer does the same job as the electric model. See your nearest G-E dealer.

UNITED CHURCH LADIES' AID

On Thursday last, October 28th, the Ladies' Aid met at the home of Mrs. Fisher to make plans for their Annual Bazaar. The date this year is December 4th, and the place, as usual, the Community hall. One feature of the occasion will be a "Parcell Post" under the direction of Mrs. Farries and Mrs. Voisey. You will remember the great interest created last year by the miniature "Post Office." Mrs. Latiff and Mrs. R. I. Baker will have charge of the sale of "Home Produce; Mrs. Chamberlain is convening the tea, and Mrs. Fisher has charge of the candy table.

The sale of aprons this year is in the capable hands of Mrs. McLeod. Miss Margaret Carlson will offer dainty doilies suitable for Christmas gifts. Mrs. F. Clever has been busy working and having worked, very pretty tea towels—almost too pretty to use in the kitchen. Mrs. Ulrich will have pillow slips ready to tempt you to unloose your purse strings. In fact the wheels are humming merrily round to produce one of the best bazaars held in recent years.

Mrs. Latiff reported the proceeds of the recent bazaar as \$17.76.

At the conclusion of the business meeting, a delicious lunch was provided by Mrs. Fisher. Mrs. Dawson and Mrs. Latiff. The November meeting of the Aid will be held at the home of Mrs. Farries.

LOCALS

Next Thursday, Nov. 11, being a holiday, the Chronicle will be issued on Wednesday.

Hallowe'en has come and gone. The kiddies took full advantage of the occasion and decorated themselves quite beyond recognition, and went merrily to work collecting goodies from the citizens, pausing occasionally to lift the odd coin, or what have you, it didn't matter much anyway, they took everything from a grain binder to the usual objective in Hallowe'en raids, over she goes boys—beat it.

Main street seemed to be the general rendezvous for the evening collections, as a sample of nearly every kind of vehicle was represented.

But apparently the boys and girls had a wonderful celebration, and todote no reports have been made regarding damage to property.

The participants in the celebration will find the odd piece of machinery on main street, perhaps they would like to remove them to some place not so conspicuous.

Thieves entered the offices of the Imperial Oil, British American Oil and the Great West Distributors some time Tuesday night, taking a few dollars in cash, some gas, clock and flash lights. Apparently the same outfit made an attempt to enter the McPhillough store down town but was not successful.

Sunny Alberta is keeping up her reputation with a generous supply of sunshine. No snow has fallen yet and the frosts have been very light. Sunday last a lovely shower of rain fell adding another supply of the much needed moisture.

LOCALS

Mr. and Mrs. W. A. McIntyre have moved into the Verduyn house.

School teachers of the local schools are in Calgary this week attending the teachers' convention.

Mr. and Mrs. W. F. Bozarth, who have spent the summer on their farm, moved into their house in town for the winter, on Wednesday.

R. H. A. McDonald and A. S. McDougall of Champion were elected to the board of directors at a recent meeting of the Alberta Swine Breeders' Association.

Mr. and Mrs. Cameron Stockand, of Banff, who were recent guests of Mr. and Mrs. Harvey Jopling, returned home. They were accompanied by Mrs. Jopling and Bill, who will spend a brief holiday in Banff.

The Champion Girls' Hockey Basketball team played Stavelay last Tuesday evening. In Stavelay, winning by 10-6. The cold weather was a handicap to both teams, but in spite of it, they turned in a good game.

A hockey meeting was held in the High School, Tuesday evening, for the purpose of organizing a pee-wee team, to be called the Comets, selecting a manager and coach and suggesting methods of raising money for sweaters.

Hockey fans will be delighted to hear that Foster Hewitt will be on the radio again Saturday, Nov. 6th, broadcasting the opening hockey game of the season, between the Toronto Maple Leafs and New York Americans at the Maple Leaf Gardens.

The High School held their annual Hallowe'en party on Monday evening, with an interesting program, amusing games, singing and dancing. Prizes were awarded Phyllis Chamberlain and Almour Marshall for best costume. A lunch was served about midnight which proved a happy ending to a very enjoyable party.

The Champion Women's Institute will meet at the home of Mrs. Voisey on Tuesday next, November 9th, at 3 p. m. Miss Schultz will speak on "International Relations"—an exceedingly interesting topic at the present time. Roll Call—Incidents Abroad. Mrs. Hummel will convene refreshments.

Larry Hag of Champion is among the 1457 freshmen and advanced students who entered Washington State college for the first time this year. Total registration reached a new record of more than 3800 students. Of this number approximately two-thirds are men and one third are women.

The annual Hallowe'en party for grades VII and VIII was held in the basement room of the Public School on Friday, October 28th. The evening's entertainment consisted of initiation of the grade seven students plus a few newcomers in grade eight, contests and games. Prizes were awarded to Linda Camellini, Laura Chaponiere and Ellsworth Stewart for best and comic costumes. The evening concluded to an end after a lunch was served by a committee from grade eight.

When a cold strikes . . .
don't take needless risks

Treat Colds This PROVED Way

WHY experiment? Vicks VapoRub has been proved for you . . . proved by everyday use in more homes than Vaseline or any other medicinal oil of its kind; further proved by the largest number of people ever made on colds. (See full details in each Vicks VapoRub package.)

Only Vicks gives you the direct action of VapoRub in the direct action of treatment . . . "no risk" of stomach upset. Simply massage Vicks into the chest, and back (as illustrated). Relief starts almost at once. You begin to feel warm and comfort-

able as VapoRub starts working on your cold. At the same time, its medicinal properties soothe the irritation of the body—carried off by every breath.

This double action loosens phlegm—relieves irritation and soothes—helps break cold congestion. Relief treatment at bedtime. After restful sleep, VapoRub keeps right on working, long after other oils, and mints, and the worst of the cold is over.

Freedom With Tolerance

Those much cherished and dearly bought attributes of democracy, freedom of thought and freedom of speech, will never be imperilled as long as they are accompanied by sincere and earnest efforts to practice the responsibilities and reasonable restraint which the enjoyment of these privileges entails.

The duty of preserving these rights which the people of this country enjoy in such large measure devolves not only upon the individual but upon all who have the direction of the channels of expression, be it the press, the human thought and literature, the pulpit, the press, the school, the theatre, the radio, the meeting place and even the home.

As long as these media of expression have full cognizance of their responsibility for the maintenance of free speech and free expression and exercise that responsibility in a proper spirit of tolerance and restraint, the privilege of free thought and free speech will remain a right to be enjoyed. If not, the danger is that these rights will become a privilege only and the privilege of the few.

Undoubtedly Sir Edward Beatty had something of the kind in mind recently when, addressing convocation at McGill University, he appealed for freedom of thought and free expression "but within the limits of accurate knowledge, sound logic, a sense of responsibility and the ordinary amenities of public life in a civilized community."

While Sir Edward Beatty, at that time, was applying the general principles he was enunciating, to the universities as leaders of thought in the communities they serve, the admonition he was conveying has a much broader application, for while these institutions of learning, exert a strong influence on present and future generations, they are also the places where the agencies to which reference has already been made.

In fact, it might perhaps be urged, with little fear of contradiction, that some of them are particularly the radio, which has had so much greater influence on the calibre of citizenship of the present day and the future, and hence, the type of government that will guide the destinies of the country, than do the universities.

The reason for this statement is not far to seek, for the newspapers and the radio are presenting viewpoints day in and day out the year round to a vast audience of all ages and of all classes, whereas direct contact of the universities is limited to a brief period of three or four or five years, and within those periods for only a portion of the year, and their direct influence is further confined to a class of youth whose parents can afford the fees of college education or who are sufficiently ambitious to find the wherewithal for the expense from their own efforts.

Hence, if the responsibility imposed on the universities to safeguard democratic rights, including free thought and free speech is great, how much greater is the responsibility of the radio and the press.

To date little or no grounded complaint has been heard that radio has not lived up to its obligations in this respect and it is to be hoped and expected that the responsibility of the radio and the press, which will keep this objective in mind, that is that while free expression of opinion broadcast in the form of speeches through the ether is highly desirable, so also is the use of restraint and the exercise of a spirit of tolerance, whether the topic be political, religious, social or economic.

The same obligation, including that of respect for the opinions of minorities, rests squarely on the shoulders of the press of the country, both daily and weekly newspapers, and it is to be hoped that the radio will have little likelihood of the people of this country acquiescing in attempts to muzzle the newspapers or dictate their policies.

It has often been said that the radio is the greatest enemy of democracy and so it is. It will continue to occupy the proud post of defender of the democratic faith as long as it continues to exercise moderation, tolerance and respect for the rights of others.

Almost without exception the weekly newspapers of Western Canada have a fine record in this respect and that is the reason they exert a profound influence in the communities which they serve. There is no reason to suppose that the responsibility of the radio and the press, which is democratic freedom and perpetuate the fine example they are giving to the press in countries which are not so fortunate as the Canadian west.

From time to time highly deserved tributes have been paid by those in authority and to the independent but tolerant spirit reflected in the columns of the weekly newspapers of the prairie provinces. In doing their duty in assisting to uphold the fundamentals of democracy the weekly newspapers have set a high standard and are doing much to foster and maintain a high standard of citizenship and to fortify their own position in the hearts and minds of the people.

Toughest Carpets Ever Made

Glasgow Is Supplying Two For London Picture House

Glasgow is to supply London with two of the toughest carpets ever made. They will be received next week by a super-trailer near Piccadilly. Both carpets are rosepink, with deep purple patterns, and have been woven about 38 to 40 feet square to stretch from vestibule to lounge.

One carpet will be laid over the other so that some of the best of changing may be avoided. Another reason for this is that while the top carpet is away being repaired the second can act as underlayment. All this is necessary, because pattern of screen art trend circulates into the floor covering at the rate of 20 a day. And a percentage of these stuba burn deep holes.

The most difficult thing for a young mother to learn is that other people have perfect children, too.

The longest railway run in the world is from Riga to Vladivostok, a distance of 6,800 miles.

Books published in Germany in the last year include 19,600 new editions.

Did Not Enjoy Ride

Man Who "Rode Rods" On Trail

Lad Claimed "Hollywood"

F. Logan Thompson, Hollywood, announced he had found probably the first hobo to "ride the rods" of a trailer. When the Thompson super-trailer struck a hole at the city limits, the driver got out to look for damage and a begrimed man crawled off a board on the dirt axle. The man said he had held on all the way from Cincinnati, and was rather unimpressed about the dirt mountain roads and the speed of Mr. Thompson's six-cylinder automobile.

Would Take Long Time

Tourists who are anxious to cover a lot of territory in a few days will be interested in knowing that a motorist, driving 45 miles an hour steadily for 10 hours a day would require 13 years, 10 months and 21 days to travel over all the improved roads of the United States. So it can't be done on one vacation, after all.

The trend to window boxes on trailers will in time evolve a back-seat type that says, "John, I believe the petunias would do better in Tennessee."

New Material For Shoes

Australia Is Going To Use Skin Of Reef Eels

A unique industry is now being started along the Great Barrier Reef, Queensland, Australia, the 200-mile-long buttress of the island continent against the bosom of the Pacific Ocean. This is fishing for the reef eels. Abounding there, they will be sought solely for their hides, which will be used to help out the wardrobe of women. Extensive research has been conducted by the government to prove that skin of reef eels can be made into a soft and extremely durable leather, and factories are being established to manufacture them into women's shoes.

The reef eel is the fiercest fighter of the Pacific. The shark is no match for it, and a diver would hesitatingly choose to fight the shark instead of the eel if he were forced to do so.

It takes a killer whale's bulk to subdue the reef eel, which, known to science as *Rhabdura macrura*, inhabits the waters about the Great Barrier Reef and is found only in tropical and subtropical latitudes.

The largest eel yet caught measured almost thirteen feet and is preserved in the Brisbane Museum. Forsooth, eel, swift, remarkably pugnacious, this "deh-deh" sea monster of the natives may well have been equipped with teeth, which stand the roof of its mouth as well as its jaws.

Still In Its Infancy

Television Pictures Seen In New York Were Blurred

Television pictures broadcast from the National Broadcasting Company's transmitter atop the Empire State Building were flashed across fifteen city blocks to be projected on a 3-by-4-foot screen to entertain members of the Society of Motion Picture Engineers assembled at Radio City.

For the first time in New York home-movie-style "teletypes" were publicly demonstrated on the enlarged screen. They were made possible by a projection tube developed by D. R. R. Law of the R. C. A. Manufacturing Company. Up to now the 7-by-10-inch radio image has been the general standard.

The large picture was viewed in a dark room. The men, the faces and its associated sound indicated compared with a 7-by-10-inch lighted picture, also demonstrated.

Veteran motion picture engineers commented as they watched a pianist perform on the large screen, that television still is in its infancy. They saw the need for much simplification of the apparatus, which at the current state of development is too cumbersome for the parlor, looking more like an electric furnace than a radio receiving set.

Condemned as dangerous, the famous "King's Oak" in Tilford, England, has been repaired. The great tree, said to be mentioned in *Bonnie and Clyde*, will be made safe by experts.

Civilized man has now progressed so far he has little to fear except disease germs and civilized man.

It has been estimated that American surgeons perform 1,000,000 operations a year.

There is always a tie between father and son but the son usually wears it.

REMINERS OF BRAVE DAYS OF EARLY CANADA

HE WAS ALWAYS TIRED AND ILL

Three Complaints Gave Him a Miserable Time

Suffering from three complaints—rheumatism, sciatica, and rheumatoid arthritis, how could this man be anything else but always tired and ill? This is what he writes.

Up to a month or so ago, I had suffered continually from kidney trouble, sciatica, rheumatoid, and general aches and pains. I was constantly tired, and under medical supervision. I tried many remedies, without effect, until I gave Kruschen Salts a trial. In four weeks, Kruschen has brought about a complete transformation. I have healthy appetite and once more feel that it is good to be alive.

The kidneys are the filters of the human machine. If they become clogged, impurities enter their way into the blood-stream, and the seed of half-a-dozen common ailments is sown.

The scientific combination of salts in Kruschen quickly coaxes the kidneys back to healthy, normal action. Your own ailments are relieved and life becomes a joy again.

For Emergency Use

Every Home In Britain To Have Six Months' Food Supply

Every home in Britain is to have its food supply, consisting of six months' "iron rations" for emergency use in the event of another war. Householders will be given the means of purchasing specially prepared parcels of imperishable food-stuffs at prices ranging from 55 to 150 according to quantity.

It will be possible to add to the cheaper parcels until the war dump is sufficient to feed a family of five or more for a maximum of six months.

For those unable to afford cash, hire purchase, credit will be arranged by the finance houses. It is estimated that within two years 5,000,000 families will have food reserves tucked away at home.

An average of £30, according to the experts of the Empire Movement, which is sponsoring the scheme, will be spent by each of the 5,000,000 families.

The new scheme will be organized by the Empire, has very substantial backing in both Houses of Parliament, and has a country-wide organization of taking the food dump plan into every town and village.

Canada's Position

Should Co-operate With Great Britain And The Empire

Where do we go from here? Some would have us play "Mary, Mary, Quite Contrary" and make a Mother Britannia melody to show that Canada is a grown-up, independent country. Others, with more realism, see that good sense no man sentiment requires that we co-operate with Great Britain and the Empire.

And the overwhelming majority of Canadian, French-speaking or English-speaking, desire that co-operation within the free institutions of the Empire. Of course, Canada comes first, but loyalty to Canada does not require that the Empire should always come a bad last.

The same policy for Canada is one of free co-operation with Britain—not just kicking—Winnipeg Tribune.

Is Automatically Set

Cheese Spray Entices Mice To Most Modern Trap

The modern mouse must be getting to be a pretty sharp fellow—at least, judging by the tricky gadgets being invented these days to catch them.

One of the latest is described by Roy C. Burns, managing director of the National Inventors' Council. "It is irresistible to the first mouse and when he enters he automatically sets it for the second mouse," explained Mr. Burns. "The first seen in front of him a modernized mouse hole, sprayed with these poisons, this and cheese at the entrance and stronger toward the end of the hole. He enters a hallway and looks into a lighted mirror, and he thinks his reflection is another mouse. Luring all caution, he moves into a glass-enclosed compartment full of mirrors, but he discovers the cheese is in another transparent chamber, and he stops to cogitate. Another mouse outside the glass enclosure sees the cheese and goes in and seizes a dozen mice—a whole convention—so he comes in, too. Another grate drops, and so it goes."

ALICE STEVENS' RECIPES

TOUGH CUTS OF MEAT CAN BE MADE TENDER

Tough cuts of meat are avoided by many people because they find the meat is not satisfactory in flavor and is hard to chew. This is the meat is not properly cooked.

As a matter of fact the tough cuts of meat have a finer flavor than tender cuts in many cases and there is no real difference in texture. Extractive give meat its characteristic flavor and tenderness. A greater quantity of extractives in the tough cuts than in the tender cuts. The quantity of connective tissue in the animal determines the texture of the cuts. A little extra help to develop this. Veal is the meat that has the most connective tissue in the animal. The tender cuts such as Sirloin steak and chops, the leanest of the meat, these muscles are used very little.

Connective tissue in meat is softened by a simple matter of softening in a liquid medium. There are four rules given for this:

Cook the meat slowly for a long time. Pot roasts require from 30 to 40 minutes to the pound, while oven roasts require 20 minutes to the pound. Tough cuts are used for the most part in soups, stews, and gravies to help to soften the connective tissue.

Cook in a tightly covered pot so the steam can help with the cooking.

Grind the meat. This breaks up the connective tissue. Meat that has been put through a meat grinder is put through a meat grinder.

Grind the meat. This breaks up the connective tissue. Meat that has been put through a meat grinder is put through a meat grinder.

IT'S GREAT TO BE BACK AT WORK

when you've found
a way to ease the
pains of

RHEUMATISM

and do it the
inexpensive
way, too.

You can pay as high as you want for remedies that relieve the pain of Rheumatism, Neuritis, Sciatica, etc. But the medicine many doctors generally approve—the one used by thousands of families daily—is "Aspirin".

Simply take 2 "Aspirin" tablets with a half glass of water. Repeat, if necessary, according to directions. Usually this will ease such pain in a remarkably short time.

For quick relief from such pain which exhausts you and keeps you awake at night—ask for "Aspirin". "Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Chemical Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get— "ASPIRIN"

Asbestos Suits For Pilots

Would Be Protection In Case Airplane Caught Fire

British air pilots are to fly in fire-proof clothes— asbestos suits in which a man could sit in a gasoline blaze without serious injury.

Ground fire-fighting trials with heavy asbestos suits have produced the new flying type, said to be lighter than the lined flying suits now worn by R.A.F. men. The material is closely woven light asbestos cloth.

Tests have shown that a pilot wearing such a suit has time after catching fire in the air to land his aeroplane and escape. In an ordinary fabric flying suit a pilot cannot stand the heat of a real blaze in his aeroplane for more than a few seconds.

An injured man in a fireproof suit could live some time in a crashed blazing aeroplane until rescuers pulled him clear. The suit consists of an overall "tummy" lined with felt, gloves and emergency visor.

The prehistoric sea lizard known as ichthyosaurus, had the largest eyes of all the creatures that ever lived. They were as large as a man's head.

More new automobiles are seen in Turkey than a year ago.

Cut Down Food Wastage

—by covering all perishable goods with Para-Sani Heavy Waxed Paper, Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knifed-cut carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER I.—Continued

Lewis extended a limp hand and murmured "How'd'ya?" He had seen cinema caricatures.

"It is an honor to welcome you to Bear Falls, your grace," said Ernest, shaking the hand.

"Much obliged," said the duke.

"The duke," explained Cooke, "is here on a secret mission. Know what I mean?"

Ernest nodded.

"The duke," went on Cooke "is here to see about having the royal collection of wild animals stuffed. He heard about the good work you do, Ernest, and he thinks maybe you're the man for the job."

"That's very flattering," said Ernest.

Cooke turned to Lewis.

"How many animals will you want stuffed, duke?" he inquired.

"Several gross," answered Lewis.

"How many elephants?"

"Three."

"Tigers?"

"Four," said Lewis. "And a half dozen lions."

"Beasts?"

"A pair of bears," said Lewis.

"How are you on bears, Mr. Bingley?"

"Splendid," said Ernest.

"Splendid, old chap, splendid," said Lewis.

"Now, Ernest," said Cooke, "suppose you go home and figure out an estimate for stuffing and mounting three elephants, four tigers, a half dozen lions, and a pair of bears. Then send in your bid. Is that okay by you, duke?"

"Absolutely okay-oke," said the duke. "Just send the bid to me, care of the king, London."

"Hey, Sam," called the clerk, "your wife wants you on the phone."

"Are wives?" grumbled Cooke, and waddled to the phone booth. Ernest watched his bulk ooze into it.

"Poor old fellow," said Ernest. "The only fun he has is making fun of other people."

"Huh?" said Lewis, sharply.

"Oh, I don't mind his little jokes," said Ernest. "This one will make him happy for days. Please don't let him know I know. Good-day, sir."

Ernest went on his way. Presumably Cooke returned from the telephone, his portly frame shaking with chuckles.

"Some book," he said.

"Yeah," said Lewis. "Some book."

That evening Ernest Bingley did not pay his almost nightly visit to the public library to seek escape in the fiction. For choice, the Watery novels of that other romanticist, Sir Walter Scott. He felt elbowed by an overall "tummy" lined with felt, gloves and emergency visor.

For supper he fashioned himself a shrimp omelette on a gas ring in his bath room, and having consumed it, a jar of cheese, a can of apricots and a stray, elderly cruller, he stretched himself out on his narrow bed, and lying there, contemplated a picture on the wall.

It was a photograph, cut from

NO TERRIBLE HEADACHE NOW

Found Quick, Sure Way
To End Them

It's fortunate that a great Canadian doctor made the famous fruit, herb and seed remedy, Fruit-A-Tives, M.C.D. Fruit-A-Tives, M.C.D. is a powerful and safe remedy for all kinds of headaches. It has been used by thousands of people who have had many kinds of headaches. When you take Fruit-A-Tives, your head is cleared. It is a powerful and safe remedy for all kinds of headaches. FRUIT-A-TIVES LIVER TABLETS

Some English sporting magazine, and it showed a noble and stately castle, complete with domes, towers, battlements, and ivy. The caption revealed that this was Bingley Castle, near Penzance, in Cornwall, and it was the home of the Bingley family since the sixteenth century.

For a long time Ernest gazed upon this historic structure, until he fell under the spell of a species of self-hypnosis, and the pedestrian moderns who draped away, and he saw a knight in shining armor, ride upon a prancing white war-horse to the massive gate of the castle. High up on one of the towers a lovely fair-haired maiden, in wimple and smock, stood waving a white kerchief at the knight.

"Be of good heart, Lady Rosalind, the knight called out. "By my halloo, I'll rescue you."

"I have waited for you so long, Sir Ernest, so long," said the damsel.

The mundane jangle of his telephone caused this vision, until he vanished from before the enchanted eyes of Ernest Bingley.

"Hello," he said.

"Mr. Bingley," asked a brisk managerial voice.

"This is the telephone company," said the voice. "We are testing your line. Would you mind standing six feet from the phone, and whistling."

"What?" said Ernest, and looking back, he whistled a few notes.

"Could you hear me?" he asked.

"No," said the voice. "Will you please try again?"

"Certainly."

"Whistle a tune this time, and whistle louder, please," directed the voice.

Ernest whistled the first four bars of "Sally in Our Alley."

"How was that?" he asked.

"Very pretty, Sir Ernest," said the voice. "Now cut a package of your bird-seed."

He heard a voice of gutturs. It was his bird-seed. He had been having one of their little jokes.

Ernest put down the phone with a flourish. Really, he was a few minutes breaking his dreams.

He stretched himself on his bed again, and gazed at the castle, but he could not see the vision any more.

"No," he said. "I was just having one of their little jokes."

He heard a voice of gutturs. It was his bird-seed. He had been having one of their little jokes.

"No," he said. "I was just having one of their little jokes."

est's chief seduce in times of stress, and at most other times, as well.

It was his one inheritance from his father, a singularly futile little man who had polished through life in an optimistic, helpless daze, piddling away his patrimony, derived from a former father, on schemes for transmitting corn-silk into real silk, or inventing complicated gadgets for feeding pigs or waking sound sleepers, which were either phenomenally impractical or had already been invented by somebody else. In blacker mood Ernest sometimes felt that he was just another one of his father's unsuccessful inventions. His mother he remembered only dimly, as something soft, warm and gentle.

Perhaps to compensate for his own lack of lustre, Bingley, senior, had turned to genealogy.

From the American Institution of Genealogy and Numismatics, located in Grosse Pointe, Texas, the elder Bingley had obtained, for ten dollars, a chart of the Bingley family tree, with all its roots, branches, twigs, and leaves, and it now hung with the Bingley coat-of-arms (another ten dollars) on the wall of Ernest's study, due east of the school diploma and another sheik's diploma attesting that he had been granted the degree of M.T. (Master of Tedium), by the Hon. Grudger Correspondence University, Joplin, Missouri.

Ernest studied a somewhat circuitous course through a network of nephews and uncles. Ernest arrived at the conclusion that the name was industrious, as the name was descended from the founder of the American branch of the Bingley clan, one John Bingley, who settled near Danbury, Connecticut, in 1783, with his bride, Lucy, and remained to become an embittered farmer and a failed politician.

Not Dangerous To Users

Public Telephone Cannot Be Called
A Disease Carrier

We continue to have a dislike to using public telephones in booths which may be used by a large number of people every day and never, apparently, disinfected. The short, funnel-shaped mouthpiece appears to be the perfect germ-trap, every person's mouth being within an inch or two of it. We, and perhaps many others, are glad to learn, therefore, that this is a misapprehension.

Over a period of eighteen months two bacteriologists of the Long Island College of Medicine experimented with public telephones in the city of New York. After the instruments had been in use some time the mouthpieces were removed and the bacteria counted. Deadly germs were found, of course, but not in such numbers that they were dangerous to telephone users. There are more germs in the booths than on the instruments. There are more germs in a picture theatre or, say, at an election meeting, than on a telephone mouthpiece.

New York telephones to the number of 246 were studied in all parts of the city—none-too-clean barrooms, restaurants, railway stations and the modern office building occupied by the Radio Corporation of America. Some of these telephones are used 6,000 times a month and others rarely. But the bacteria on telephones used 6,000 times a month are no more numerous than on home telephones used only once or twice a day.

The public telephone, therefore, is not a disease carrier—St. Thomas Times-Journal.

Radium Under The Sea

Sediment On Bed Of Ocean Contains
Valuable Substance

Tremendous new reservoirs of radium, one of science's major weapons in combatting cancer, have been found in sediment taken from ocean depths, Charles Snowdon, Pigeon, of the Carnegie Institute, of Washington, revealed.

Pigeon is an expert in taking "dredges" from as deep as three miles below the surface. The cores, ranging up to 10 feet in length, portage the historical record of the ocean.

The discovery opens new avenues for research, he said, adding that the radium concentrations are greater in those portions of the ocean more remote from lands and lying at the greatest depths.

Hints New Discovery

Dance Of Blood Clot Following
Operations May Be Removed

Research at the University of Toronto within the next year or two may remove the blood clot following operations, surgery's greatest danger, Canon H. J. Cody, University president, told a gathering in Toronto. Canon Cody who was made a Master at eight highest honor within the craft, told the meeting in the Masonic Temple the report of the Board of Governors would make reference to the research in its present "incipient but gratifying state."

Lord Rothschild, who died recently, left 2,600,000 interferences and notes, a gallery of stuffed animals and private museum to preserve them, to the Natural History Museum at Tring, England.

Little Helps For This Week

I said, I will take heed to my ways that I sin not with my tongue. Psalm 39:1.

No sinful word, nor deed of wrong. Nor thoughts that live raw. But simple truth be on our tongue. And in our hearts be love.

Let us all resolve to attain the grace of silence, to deem all fault-finding that does no good a sin, and to resolve when we are happy ourselves not to poison the atmosphere for others by calling on them to remark every disagreeable feature of their daily life, and resolve to practice the grace and virtue of praise.

If we are surrounded by those who constantly exhibit defects of character and conduct, and we yield to a complaining and impatient spirit, we shall mar our own peace without having the satisfaction of benefiting others.

THIS BACKACHE
IS A
AGONY.

GIN PILLS
FOR THE KIDNEYS

KIDNEYS WILL CAUSE IT!
Stagnant kidneys let toxins accumulate in your system. Accumulate in kidneys and then in the blood. This causes backache, rheumatism, and all the other ailments of the kidneys.

GIN PILLS will give the kidneys the help they need to get rid of the toxins. They will cause the kidneys to work properly.
